

STARCUT

Semi-automatic biopsy needle STARCUT

Quality, All the way, Always, That's TSK.

STARCUT

Semi-automatic biopsy needle STARCUT

The semi-automatic biopsy needle STARCUT is used to insert into the human body to collect soft tissue for the purpose of examination, treatment, or diagnosis.

Feature

1 Needle tip

Sharp needle tip reduces stress during puncture.

2 Depth Marker

You can visually check the puncture depth.

Lines are placed at 1cm intervals, and double lines are placed every 5cm.

3 Two different penetration lengths

The penetration length can be selected from 11 mm and 22 mm to suit the procedure.

4 Lock position

The set protrusion length of 11mm and 22mm can be visually confirmed from the window of the main unit. (写真は22mm)

※Please check the latest package inserts before use.
